

To whom it may concern:

I am a paying customer of xm satellite radio and as we travel around the country in our vehicle and sometimes pulling our 5th-wheel, it 's nice to get the weather and news and traffic without interruptions. I think that because I pay for this service, I should be able to listen to programs that I choose without all the garbage that is on regular radio.

I also feel that the air-waves should be for all of us to enjoy however we can legally obtain them.

Thank you for your time.
